## 8- SALT PILL SOLUTION AND FLUID LOSS CONTROL

This customized Salt pill is %99 evaporated pure graded NaCl, vacuum dried, it is being pumped into the well to seal a perforation and allow work over activity.

1. Temperature Stability up to 350 deg. F.
2. Will flow back and is %100 dissolved in produced or any under saturated water.
3. Seal formation up to 5,000 Psi overbalance.
4. Applicable for Gas Wells & Oil wells.
5. protect the formation from liquid and solid invasion into the production zone.
6. Helpful for hole cleaning and cutting transport.

Salt pill used to seal at the face of the producing formation during workover for all types of wells:

- Deep, high reservoir temperature wells.
- Gas wells.
- Cased/open hole wells.
- Horizontal wells.
- Suitability to be pumped out through all types of artificial lift.

### FLUID DESIGN:

Bridging solids provide a filter cake build up to prevent loss of fluid and solids particles into a permeable formation.

Our objective this is to obtain a tight filter cake with the closest possible packing to reduce cake Porosity and Permeability.
